QUALITY AND ENVIRONMENTAL POLICY

MORRESI ENZO & C srl has always pursued compliance with applicable requirements, taking into account contextual factors and the relevant requirements of interested parties. Furthermore, through the development and updating of the Quality and Environmental Management System, the Company aims to refine its processes, establish working and communication methods among the various functions, and define the activities governing the exchange of information within the Company and between the customer and the Company.

MORRESI ENZO & C srl therefore intends to pursue the following objectives:

1. Customer satisfaction

1.1. A system compliant with UNI EN ISO 9001:2015 and UNI EN ISO 14001:2015 standards
1.2. Products capable of meeting expectations
1.3. Procedures for handling complaints and implementing corrective actions
1.4. Measurement and analysis of customer satisfaction
1.5. Products compliant with applicable regulations

2. Business competitiveness

Ensured through:

2.1. Careful management of the order portfolio through structured analysis of revenue by type of work
2.2. A dynamic and effective organization through the development of:

- 2.2.1. Actions based on risk/opportunity analysis
- 2.2.2. Practices/protocols for controlling cross-functional/management activities (documented information management, audits, training, supplier management, purchasing...)
- 2.2.3. Hardware and software systems aimed at increasing productivity and reliability in the management of data and activities within the company management system

3. Production efficiency

Ensured through:

3.1. Appropriate procedures/instructions for process control
3.2. Analysis of non-conformity (NC) events

4. Economic and financial control

Monitoring the Company's economic and financial performance through the analysis of absolute and percentage variances between budgeted and actual figures.

5. Employee satisfaction and engagement

In compliance with applicable laws, through:

5.1. Respect for workers' rights
5.2. Participation in internal or external training courses in relation to the duties performed and Company needs

5.3. Compliance with applicable workplace health and safety legislation
5.4. Respect for privacy and applicable data protection legislation

6. Communication

Support for communication activities through:

6.1. Company brochures and presentations provided to requesting stakeholders
6.2. Transparent communication of environmental performance to interested parties

7. Continual improvement

Through monitoring, review and the planning of objectives and targets:

7.1. Quality and environmental improvement plans

8. Environmental protection and sustainability

MORRESI ENZO & C srl is committed to:

8.1. Pollution prevention - Adopting preventive measures to minimize atmospheric emissions, water discharges, waste generation and any other form of environmental impact arising from its activities

8.2. Regulatory compliance - Complying with all applicable environmental legal requirements, as well as any requirements voluntarily adopted by the Company

8.3. Sustainable resource management - Promoting the efficient use of energy, water, raw materials and auxiliary materials, giving preference, where possible, to renewable resources and recycled materials

8.4. Waste reduction and material recovery - Applying the principles of the waste hierarchy (prevention, reuse, recycling, recovery) and ensuring the proper management and disposal of waste generated

8.5. Control of significant environmental aspects - Identifying, assessing and controlling the environmental aspects of its activities, products and services, with particular attention to those that may generate significant impacts

8.6. Reduction of greenhouse gas emissions - Monitoring and progressively reducing CO_2 and other greenhouse gas emissions, contributing to decarbonization objectives

8.7. Awareness and training - Promoting environmental awareness at all levels of the organization and involving personnel in achieving environmental objectives

8.8. Supply chain engagement - Encouraging collaboration with suppliers and contractors that share the commitment to environmental protection and comply with the environmental requirements defined by the Company

8.9. Life-cycle perspective - Considering environmental impacts throughout the entire product life cycle, from design and procurement to production, distribution and end of life
